SUMMARY

Highly motivated AI & ML student with a strong foundation in data science, machine learning, and programming (Python, R, SQL). Proven ability to apply analytical skills to solve complex problems, develop predictive models, and communicate technical insights. Seeking a Data Science position at Google to leverage expertise in machine learning and contribute to impactful data-driven solutions.

EXPERIENCE

Goldman Sachs

– December 2023

Software Engineering Virtual Experience Program on Forage

- Completed a job simulation as a Goldman Sachs governance analyst responsible for assessing IT security and suggesting improvements.
- Identified that the company was using an outdated password hashing algorithm by cracking passwords using Hashcat.
- Wrote a memo for my supervisor summarizing a range of proposed uplifts to increase the company's level of password protection including extending minimum password length and using a dedicated hashing algorithm.
- Concepts learned: Cryptography, Hashing Algorithms

EDUCATION

NNRESGI

– 2025

B. Tech in AI & ML, GPA: 7.20

Hyderabad

Nano Junior College

– 2021

Class XII, GPA: 90.0

Sri Sai Public School

– 2019

Class X (ICSE), GPA: 87

SKILLS

Programming Languages: Python, R, SQL, Java, C/C#

Machine Learning & Data Science: TensorFlow, Data Analysis, Predictive Modeling, Statistical Analysis

Tools & Platforms: Excel, Linux, Git, Hashcat, Unity Engine

Web Technologies: HTML, CSS, Node.js

Embedded Systems: Arduino Programming, Raspberry Pi

Other: Trading on crypto markets

PROJECTS

Cotton Plant Disease Detection and Classification using Transfer Learning

– April 2024

Python, TensorFlow

- Utilized pre-existing CNN models and implemented transfer learning for enhanced model performance.
- Built a Machine Learning model to predict various types of diseases on a cotton leaf based on image processing.

Personal Portfolio

Html, CSS

[View Project](#)

- Designed, developed and hosted a website to showcase my projects and skills.

Game Development

– October 2023

C#, Unity Engine

- Utilized the Unity Engine to develop a solar system model for educational purposes, promoting gamified learning.
- Built a game similar to Flappy Bird with 3D renderings in a first-person point of view.

Hackathon on Mechatronics

– July 2023

Arduino Programming, Python, Raspberry Pi

- Explored multiple Arduino-based projects for various use cases like house security systems, and obstacle avoidance.

RELEVANT COURSEWORK

Game development, Algorithms, Compiler design, Operating systems, Data Structures, Machine learning, Data science, Database Management

POSITIONS OF RESPONSIBILITY

Annual Tech Event Stall Manager (March 2023)

- Managed and led a team of 3 to set up a food stall to raise funds for the event.
- Generated a gross profit of 97% on the invested money for the stall.

EXTRACURRICULAR ACTIVITIES

Selected for the college football team and led the team as Captain for a year.
